Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 36, drawn to an electronic commerce transaction audit system comprising: log analyze means for calculating a frequency of occurrence of an abnormal response in connection with the event occurred in the entire network area and verified and determined by said transaction log collect means, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity, classified in class 726, subclass 5.
- II. Claims 35, drawn to an electronic commerce transaction audit system comprising: log analyze means for obtaining time that elapses before a response message is returned after receiving a request message in connection with the event occurred in the entire network area and verified and determined by said transaction log collect means, whereby auditing a respond reaction ability of each electronic commerce transaction entity, classified in class 713, subclass 178.
- III. Claims 33-34, drawn to an electronic commerce transaction audit system comprising: log analyze means for comparing the event occurred in the entire network area and verified and determined by said transaction log collect means with an event grasped in advance and to be generated in the entire network area, whereby auditing conformity with specifications on the electronic commerce transaction between the respective electronic commerce transaction entities, classified in class 705, subclass 36.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as log analyze means for calculating a frequency of occurrence of an abnormal response in connection with the event occurred in the entire network area and verified and determined by said transaction log collect means, whereby auditing an abnormal response processing ratio of each electronic commerce transaction entity. Invention II has separate utility such as log analyze means for obtaining time that elapses before a response message is returned after receiving a request message in connection with the event occurred in the entire network area and verified and determined by said transaction log collect means, whereby auditing a respond reaction ability of each electronic commerce transaction entity. Invention III has separate utility such as log analyze means for comparing the event occurred in the entire network area and verified and determined by said transaction log collect means with an event grasped in advance and to be generated in the entire network area, whereby auditing conformity with specifications on the electronic commerce transaction between the respective electronic commerce transaction entities. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
